12 VOLT - Single Bar Towel Rail (Square)

This guide shows the installation of the single bar heated towel rail. Multiple rails can be installed together in any configuration and must be wired in parallel (see wiring diagram). Pre-wiring in the wall cavity or ceiling is required.

- Step 1:** Mark mounting holes according to dimension of rails remembering to also allocate mains electrical supply in wall or ceiling at the mounting points.
- Step 2:** Feed cable coming from the rail, through the hole in the fix bases and then through hole in the wall/ceiling. Connect to 12 volt transformer in the cavity.
- Step 3:** Mount the 2x fix bases into the wall by first inserting the plastic expander and then screwing the ST5*45 mounting screw.
- Step 4:** Slide the ends of the rails over the fix bases and tighten the M5*6 mounting screws on the underside with allen key.

***NOTE: Any electrical work must be carried out by a qualified trades person only.**
